➤ Types of Distributed Databases:

- Homogeneous Distributed Databases:
  - Autonomous
  - Non-autonomous
- Heterogeneous Distributed Databases:
  - Federated
  - Un-federated

➤ Distributed DBMS Architectures:

- Three parameters:
  - Distribution
  - Autonomy
  - Heterogeneity
- Architecture Models:
  - Client - Server Architecture
  - Peer- to-Peer Architecture
  - Multi - DBMS Architectures (with multi-database conceptual level)
